🚩Wordpress Website Design
WordPress is an open source blogging tool and an effective Content Management System, preferred and used on more than 14 million websites. WordPress is based on MySQL and PHP and provides user friendly features, including a plug-in architecture and a template system, making it the most popular CMS on the Internet.

🚩Advantages of WordPress for your site.

✔Easy to use: The most striking feature of WordPress is that its functions are simple, making any user an expert. The tool includes an inbuilt dashboard, where users can classify links with category, theme, tools and setting.

✔SEO friendly: WordPress sites are search engine friendly. Its structure is embedded with a self-ping feature, whereby every time the user updates the blog or anrticle, it clings to major search engines. Moreover, additional plug-ins can be embedded with the existing WordPress to enhance the reach of your site.

✔Additional plug-ins and themes: WordPress offers plenty of plug-ins and themes that is important for interface and navigation of your site. They are customizable for user requirements with downloading options.
